

Business Value

Businesses are increasingly turning to software solutions to reduce costs while improving speed and quality. Companies need smarter ways to manage information and workflows. That's why more than 4 million users worldwide have turned to Brava as a way to increase profit, productivity, and customer satisfaction. Fully integrated to IBM FileNet P8, Brava offers significant business advantages.

Brava helps companies reach business goals by making it easy to find, view, and collaborate on documents. Brava supports virtually any file, including office and PDF documents, CAD drawings, and image files (like TIFF and JPG), so it reduces the need for installed desktop applications. Offering the right combination of features and simplicity, Brava ensures fast user adoption and helps knowledge workers make quick, accurate decisions.

Across every industry, redaction is an essential part of document and records management, regulation compliance, and e-discovery readiness. Brava can redact sensitive or privacy content for secure sharing, helping instill a proactive risk management culture throughout the enterprise. Brava makes sharing content safe and convenient.

Brava!® for IBM FileNet P8

A smarter way for your enterprise to view, annotate, redact, and publish critical information.

Better viewing, better communication, better decisions, integrated.

**OVERVIEW**

Brava!® by Informative Graphics Corp. (IGC) provides a simple way to share content across the enterprise. It extends the capabilities of the IBM FileNet P8 platform to include multi-format viewing, annotation, redaction, and publishing, all in one intuitive interface. Because it supports virtually any document format—office documents, PDF, image formats, and CAD drawings—it is perfect for review, approval, and other critical business processes in any industry. By speeding these business cycles and improving communication, companies can make more informed and accurate decisions and better control the flow and use of data.

View

View and annotate virtually any document, image, or drawing through one easy interface.

Annotate

Add comments, markups, and stamps to any document.

Redact

Block sensitive data for outside distribution.

Publish

Easily publish files to TIFF, PDF, or our secure Content Sealed Format (CSF) with Visual Rights®.

Features & Benefits

Multi-Format Viewer

View and annotate virtually any document, image, or drawing. Brava supports any format that can be printed by an accessible Windows-based application.

Faster Viewing, Faster Browsing

Brava loads files fast, so little time is wasted waiting for the image to display.

Easy, Unified Interface

Brava offers viewing, annotation, redaction in a single, intuitive interface. Multi-format viewer supports virtually any document format, including office documents, TIFF, PDF, image formats and CAD drawings, so it is perfect for review and approval cycles.

Seamless Integration

Brava's solution seamlessly integrates to IBM FileNet P8.

Highly Configurable

Easy to install and easy to integrate, you can customize Brava to fit your needs and environment.

Scalability

Brava can meet response time and throughput objectives even as demand increases.

Page Thumbnails

Jump right to the page you need without navigating the entire document/drawing set.

Term-Hit Highlighting

All instances of a search string are highlighted for quick identification.

Markup and Annotation Tools

Add comments, markups, and stamps to any document for easy collaboration.

Concurrent Annotations

Users can perform parallel reviews then consolidate the markups into a single, master file.

Secure Redaction

Use redaction tools to block sensitive content from view, print, copy, and search. Redact by word/phrase, phrase list, or zone. Brava completely removes redacted content so no metadata is transferred to the redacted file.

Original Files Untouched

Whether annotating, redacting, or just viewing, the source file remains safe in the repository. Create a new rendition of the redacted file, leaving the original file untouched.

Save to PDF, TIFF, or Secure CSF

Save and distribute the redacted file in a new PDF, TIFF, or secure CSF.

Publish with Security Controls

CSF lets users add password protection; restrict print, copy, layer views, and more; add watermarks and banners; and time-expire the file. Because CSF is proprietary, it is completely secure. CSF files are viewable by the free Brava Reader.

Technical Specifications

Integrates to IBM FileNet P8 versions:
4.0, 4.5

Recommended end user OS:
Windows XP SP2, Windows 2000 SP4,
Windows 2003 and Windows Vista

Recommended end user browser:
Windows Explorer 6.0 or greater

Recommended Server OS:
Windows 2003 Server, Windows XP Pro
