

Redact-It® for IBM FileNet

Smart, secure removal of sensitive information for the enterprise.

OVERVIEW

Redact-It® by Informative Graphics Corp. (IGC) makes it easy to remove privacy information and sensitive content wherever documents enter the system. Whether paper documents are scanned using IBM FileNet Capture or electronic documents are being added to the FileNet P8 repository, Redact-It can remove sensitive content and privacy information automatically.

Redact-It products for IBM FileNet make redaction an automated part of your document workflows so content security is inherent in the system.

- Automatically removes sensitive content as part of a process
- Offers easy tools for human verification of redactions
- Seamlessly integrated to IBM FileNet Capture and P8
- Completely removes redacted text and all metadata

Business Value

Businesses today face increasing challenges to find better, smarter ways to drive process efficiencies while also responding to broader requirements for information sharing and tighter regulations on privacy protection. Redact-It for IBM FileNet Capture is an automated redaction tool which helps businesses automatically protect information without slowing workflows.

While redaction is a simple procedure, common mistakes can have very costly consequences. Litigation, corporate espionage, regulation compliance and privacy protection are just a few of the reasons why companies are increasingly turning to Redact-It as a smart, secure redaction solution.

Redact-It completely removes redacted content and transfers no metadata to the output file, so your enterprise can confidently move documents through the workflow process knowing that no hidden text or document properties are lurking unseen. The unredacted version of the file remains safely untouched in the repository for authorized users.

Which Redact-It Product Is Right For Me?

Redact-It Enterprise for IBM FileNet P8

Intelligent Redaction

Redact by area, one or more search strings, or using pre-set patterns like Social Security number, phone number and email address. Create complex expressions using wildcards.

On-demand or Batch

Redact individual documents on-demand in an automated workflow process or batch-redact thousands of documents.

Supports Any Format

Redact office documents, images (like JPG and GIF), and even CAD drawings.

Output Formats

TIFF, PDF or our proprietary, secure CSF format with Visual Rights®.

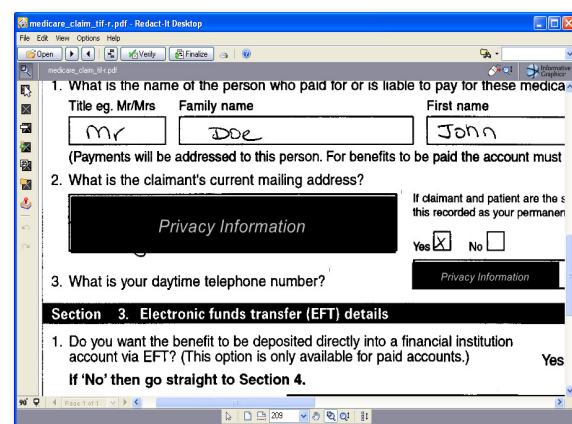

Redact-It for IBM FileNet Capture

Redact by Index Zone

Zone-based redaction based on pre-defined templates. Apply redactions to zone only or the zone and OCR text.

Release Redacted and Non-Redacted Files

After redaction, Redact-It can release both the redacted and non-redacted TIFF or PDF files to the same or separate workflows.
